Professional Summary

MERN Stack Developer with hands-on experience building full-stack web applications using React, TypeScript, Node.js, Express.js, and MongoDB. Skilled in designing responsive user interfaces, developing RESTful APIs, implementing authentication and authorization systems, and managing database operations. Passionate about writing clean, maintainable code and building scalable web applications with modern development practices. Strong understanding of frontend and backend architecture, API integration, performance optimization, and software development workflows.

Technical Skills

Frontend

- HTML5
- CSS3
- Tailwind CSS
- JavaScript (ES6+)
- TypeScript
- React.js
- React Router
- React Query
- Axios

Backend

- Node.js
- Express.js
- REST API Development
- JWT Authentication
- Authorization & Role Management

- Error Handling
- Input Validation
- Security Best Practices

Database

- MongoDB
- Mongoose
- Aggregation Pipeline
- CRUD Operations
- Query Optimization
- Filtering & Pagination
- Sorting & Projection

Tools & Technologies

- Git
- GitHub
- Postman
- VS Code
- Vercel
- Render
- Chrome DevTools

Software Engineering Concepts

- MVC Architecture
- Layered Architecture
- RESTful API Design
- Responsive Design
- Version Control Workflow

Projects

Twitter Clone (Full Stack)

Live : <https://xcomclone-five.vercel.app/>

Github : <https://github.com/abrarmahabub125/x-clone>

Overview

Built a full-stack social media platform inspired by Twitter where users can create posts, follow other users, bookmark content, and manage personal profiles.

Key Contributions

- Developed a secure JWT-based authentication and authorization system.
- Built RESTful APIs using Express.js and MongoDB.
- Implemented tweet creation, update, deletion, and bookmarking features.
- Designed follow/unfollow functionality and user relationship management.
- Created responsive UI for desktop and mobile devices.
- Integrated frontend and backend with efficient API communication.

Technologies

React.js, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, React Query

Book Library Management System

Live : <https://book-library-frontend-gilt.vercel.app>

GitHub : <https://github.com/abrarmahabub125/book-library-frontend>

Overview

Created a modern library management application that enables users to manage and organize book collections through a clean and user-friendly interface.

Key Contributions

- Implemented CRUD operations for book management.
- Developed responsive and accessible user interfaces.
- Built reusable components to improve maintainability.
- Enhanced user experience through efficient state management.

Technologies

React.js, Fake JSON server, Tailwind CSS, Vite

Soft Skills

- Problem Solving
- Analytical Thinking
- Communication
- Team Collaboration
- Time Management
- Self-Learning Ability
- Attention to Detail

Languages

- Bangla — Native
- English — Basics
